3 CHANGE REPORT.....5

1 INTRODUCTION

1.1 Document Purpose

The purpose of this document is to provide a summary of changes made to the Constrained Values (CV) tables referenced by the CorDM, as it evolved from release 6 to release 7.

1.2 Document Audience

The audience of this document includes Information Strategy Planners, Analysts and Application Developers who will use the CorDM as the basis for information strategy planning, business analysis and software application component development.

1.3 Scope of Report

The document summarises changes made to the CorDM CV tables since release 6. It does not provide details of specific changes made to individual CVs, which can be obtained from the Code List Management Service (CLMS).

2 Code List Management Service

Prior to Release 7 of the CorDM, the CV tables were available as an Access database download from the CorDM website.

For Release 7 of the CorDM, the CV tables are referenced through the Code List Management Service (CLMS). This is a web based registry for storing and maintaining Code Lists.

The CLMS contains a Context for CorDM version 7 at <http://www.joinedupsystems.net/live/Context.aspx?ContextId=1799>. This Context contains the full set of Enumerated Data Types (EDTs) relevant to CorDM release 7. Each EDT references the version of a CV set that was the latest at the time of publication of release 7.

The CLMS provides the facility to download the contents of individual CV lists, and also to produce reports showing the differences between 2 versions of a CV list.

CLMS does not currently provide a differences report between Contexts. The summary of differences between CorDM release 6 and CorDM release 7 are therefore listed in section 3 of this document.
